

---

Topoevn is one of the best podcast client apps available on the Apple App Store, and it is definitely worth your time on your iPad or iPhone. It offers several features that truly set it apart from the competition, including features that help you find podcasts to listen to, as well as an "edit" feature that easily lets you change podcasts on the fly. These features all lead up to a perfect podcast experience. The app contains a sleek design with an interface which is simple, easy-to-use, and appealing. It is a pleasure to use on your device. There are several areas on the screen which contain options for you to choose from. These areas include an area where you can add your podcasts, a search area for finding more podcasts, and a part where you can manage your podcasts. Using Topoevn is an easy process of adding the podcast of your choice, searching for a podcast of interest, and then listening to whatever podcast suits your fancy. Adding a podcast couldn't be easier: type in the name of the podcast of interest and it will begin downloading right away so that you can listen to it from start to finish. This app has really good search capabilities, but to get the most out of them you need to know how to properly use them. For example, the search functionality will show you podcasts that are similar in topic to your search term. What this means is that you can enter a subject for your podcast and then let Topoevn find podcasts that are similar in topic to what you are looking for. The editing function within Topoevn is an extremely useful feature, allowing users to quickly change the name, description, artwork, tags, and URL of any podcast. One of the best features about this app is that it will automatically remember your position in podcasts that you are listening to. For example, if you listen to a podcast for a couple hours and then quit the app, when you open the app back up again it will automatically start playing from where you left off. This is a really convenient feature for users. The only downside to this app is that it does not allow multiple users. It would be incredibly helpful to be able to share podcasts with other users on your device. This app could be a lot more useful if multiple users could share their podcasts with one another. Topoevn is an excellent free app that is full of features that make listening to podcasts amazing. It can easily be recommended for anyone who listens to podcasts and wants the best podcast client app available on the Apple App Store. Ratings: 4/5 Stars What others are saying about Topoevn: "Best Podcasts App out there" - RoncoEffectSolutions.com "An awesome audio app, don't miss it if it's on your list!" - Fred C., TheTechGuy.
